Summary

Senior software engineer with 7 years of experience building production web platforms in Rust and TypeScript. Sole engineer behind a rebuilt web scraping engine (400 jobs/s sustained, anti-bot unblocking), and delivers full-stack client platforms end to end.

Technical Skills

Languages: Rust, TypeScript, JavaScript, SQL, PHP

Backend: Axum, Tokio, tonic (gRPC), sqlx, Hono, oRPC, Laravel

Frontend: React, TanStack Start/Router/Query, Next.js, Vue, TailwindCSS, shadcn/ui

Data & Messaging: PostgreSQL, Redis, RabbitMQ, BullMQ, BigQuery, Drizzle ORM

Infra & QA: Docker, Kubernetes, GitHub Actions, DigitalOcean, Vercel, Cloudflare Workers, Vitest, Playwright

Web Automation: Chromium/CDP, anti-bot bypass (Cloudflare, PerimeterX, Kasada), residential proxies

Experience

Senior Software Engineer

Apr 2026 – Present

Strata52

Contract

- Automated a digital marketing agency's weekly financial reporting and client onboarding end to end, replacing manual report assembly and hand-offs across 18+ tools with 17 scheduled jobs that run unattended.
- Digitized five back-office workflows for a multi-entity services group (bond closeouts, entity license renewals, field quotes, field checklists, bid intake), replacing spreadsheet tracking and inbox triage with automated broker reports, license-expiry reminders and AI-filed bid documents.
- Built a single workflow that takes Strata52 from client meeting transcript to approved proposal, roadmap and engineering spec, with built-in client review and approval gates.
- Gave Texas school districts a live view of recoverable HB3 Outcomes Bonus funding per at-risk student, plus intervention tracking for principals and counselors, across five SOW deliverables.

Senior Software Engineer

Nov 2025 – Present

PT Pena Teknologi Indonesia (MrScraper)

Full-time

- Rebuilt MrScraper's core scraping engine as sole engineer, taking sustained throughput to 400 jobs/s (2.4x peak target) on a platform sized for 1M+ scrape requests a day, after first speeding up the legacy scraper by up to 40%.
- Made bot-protected sites scrapeable for customers with an unblocking layer that recognizes bot managers, solves captcha challenges and replays verified sessions before escalating to a stealth browser.
- Kept customers' browser scrapes from being flagged as automated by shipping a custom patched Chromium build that passes hardware-level fingerprint checks off-the-shelf stealth tooling cannot.
- Opened MrScraper to no-code users by publishing a Zapier integration and building n8n scraping pipelines for real-estate and retail-pricing use cases.

Co-Founder

Dec 2023 – Present

IMPHNEN

Community

- Co-founded IMPHNEN, an Indonesian developer community, and grew its Facebook group to 350K+ members.
- Organize and run recurring community events that bring members together to learn, share projects and network.

Lead Software Engineer

Jun 2025 – Nov 2025

Bsmart A.I.

Part-time

- Led end-to-end development of the flagship apps Aura and YesDateMe, from architecture to public launch.
- Owned the DevOps workflow, setting up CI/CD pipelines for automated build, testing and deployment.
- Mentored junior developers through code reviews and technical guidance.

Software Engineer

Aug 2022 – Sep 2025

DOT Indonesia

Full-time

- Engineered a custom Vite boilerplate replacing Next.js, speeding up onboarding and project setup by 70%.
- Created a new "vibe-coding" template and CLI tool, which accelerated feature development speed by over 150%.
- Built scalable web components with ReactJS, TailwindCSS and Ant Design, cutting feature dev time by 35%.

- Lead Software Engineer**
PT Indonusa Persada Teknologi

Jan 2025 – Jun 2025
Freelance

 - Led 4 engineers on a micro-frontend agriculture backoffice app with module federation and a shared UI kit.
 - Reduced manual data processing by 70% through scalable CRUD workflows and reusable logic blocks.
- Software Engineer**
PT Interna Cipta Asia (Scalev)

May 2021 – Aug 2022
Full-time

 - Engineered the core e-commerce toolkit, including the landing page builder, digital product delivery system, and order management features.
 - Delivered interfaces with a 99.5% Lighthouse performance score and reduced average page load by 2.3s via SSR and asset optimization.
- Software Engineer**
PT Telematric Integra

May 2019 – May 2021
Full-time

 - Migrated legacy internal apps from CodeIgniter 3 to Laravel 6, improving maintainability and performance.
 - Built and maintained 10+ internal logistics tools, saving 100+ man-hours per month.

Projects

- Marketing Agency Superapp – Finance & Operations Platform**
Confidential client

Apr 2026 – Present

 - Built a Hono + oRPC API and React 19 + TanStack Router app for weekly financial reporting, client onboarding and AI-generated marketing strategies, integrating Accelo, Proposify, Pipedrive, QuickBooks, Slack, ad platforms and SEMrush.
 - Migrated hosting off Vercel to Docker Compose on DigitalOcean droplets, with a node-cron scheduler running 17 jobs and GHCR images promoted from staging to production.
- Services Group Superapp – Multi-App Back-Office Suite**
Confidential client

Jul 2026 – Present

 - Co-developed a moon + npm monorepo of seven back-office apps (Hono + oRPC, Drizzle, better-auth, Redis/BullMQ, React 19 + TanStack Router), building Bond Closeout, License Renewal, Field Quote, Field Checklist and AI-assisted Bid Intake.
- K-12 Revenue Intelligence & Student Success Platform**
Confidential client

May 2026 – Aug 2026

 - Built a Laravel + Vue/Inertia platform on BigQuery showing superintendents recoverable HB3 funding per at-risk student, with what-if simulators, an MTSS intervention engine and counselor case management.
- Web Scraping Platform – Scraping Engine & Anti-Bot Unblocker**
Confidential product

Nov 2025 – Present

 - Built a Rust platform (Axum, Tokio, tonic gRPC) with RabbitMQ job queues, a retry ladder and dead-letter queue, a Postgres transactional outbox and Redis rate limiting on Kubernetes (k0s), plus an unblocker that routes blocked pages by bot manager (Cloudflare, PerimeterX, Kasada) to a pooled Chromium fleet.

Education

- Universitas Islam Nusantara**
Bachelor of Engineering (S.T.) in Informatics Engineering

Jun 2020 – Jun 2024
GPA: 3.7/4.0
